STOP

USE OF FIRE EXITS... EXCEPT FOR EMERGENCIES!

Unauthorized use of emergency exits results in security danger, loss through pilferage, financial loss. SAFETY ALARM LOCK ends this problem once and for all. It legally locks exit doors from the inside.

When opened, except by key, a piercing alarm sounds which can be shut off only by an authorized individual with a key! One model fits ALL industrial needs; right or left, in or out, single or double doors, with or without panic bars.

- REDUCE NEED FOR EXIT GUARDS
- DO AWAY WITH BACK DOOR PILFERAGE
- AVOID VIOLATIONS OF FIRE CODE
- KEEP YOUR EXITS PANIC-PROOF
- AUTOMATIC ALARM IN EVENT OF CALAMITY

EMERGENCY EXIT ONLY
PUSH TO OPEN & SOUND ALARM

Now it's legal to lock emergency exits with SAFETY ALARM LOCKS

For Key Control of Alarms, Electric Strikes, Electric Locks

—FOLGER ADAM— KEY OPERATED SWITCHES

Sturdy, tamper-resistant! Wide application in lock and alarm control. Also used to control lighting, machinery, and other electrical devices when it is desired to restrict usage and prevent tampering. Many features—maintained or momentary contact—built-in pilot lights—extra circuits—delayed time control. They will key into existing systems and they fit into standard electric outlet boxes. They are adaptable to fit your needs.

Folger Adam, the prison lock people famed for keeping people locked in, now offer ingenious devices for keeping people locked out. For more security, find out about them!

PRESS-AT-ANY-POINT TAPESWITCH ALARMS

Tapeswitch ribbon and area switches are normally open, momentary contactors, activated when pressure is applied to any point of its length. Totally waterproof when properly end-sealed, it can be cut to any length, will withstand heavy forces without damage and flexed without shorting. Write for catalogue and technical bulletins.

Even Jesse James could pass muster here if he had a good tailor. Appearances deceive. Photographs don't. So Omni-Card Systems pay off even if all you need is a tamper-proof means of positive identification. Or use it as a "borrowing" card, to keep track of anything from monkey wrenches to company cars. And if your company rises or falls on advance marketing plans or confidential information, use Omni-Card to limit access to your files. Our exclusive brain bank can give you a depth study on additional profitable uses. Please write for full information. We promise not to sell you a camera.

M.S.® DEADLOCK FOR THE ACTIVE DOOR

Half of this massive laminated steel bolt is retained within the narrow stile; the other half is thrust into the jamb. The only way through this lock (without a key) is to tear the door down. Ask any disappointed burglar.

CYLINDER-OPERATED 1870 FLUSHBOLT FOR INACTIVE LEAF

Activated by any standard mortise cylinder, the 1870's hardened steel bolt projects into the header or threshold. This gives management key-control of the inactive leaf of pairs where building codes permit separate operation. Write: Adams Rite Mfg. Co., 1425 Grand Central, Glendale, Calif. 91201.

Do You Ever THINK

Do I really need security?

Am I spending too much for what I get?

Is my Security function materially contributing to my net profit through measurable loss reduction and sustained loss prevention programs?

These are valid questions and must be considered. The recognition that security is necessary does not mean it should be immune from objective evaluation to determine if it is adequately and continually serving your total needs! Almost every other function of the company is.

Your questions are best answered by an outside, objective, security consulting firm not affiliated with a guard, alarm or investigative company.

B. E. Gorrill, former President of Gor-Buc Security Systems, Inc., a nation wide firm and ex F.B.I. Agent has been active in all phases of the security profession for over 18 years and is qualified to analyze your security requirements and recommend a sound program keyed to your specific needs. Considerable savings and a more efficient and effective security function can be achieved.

For more information write to B. E. Gorrill & Associates, 1543 West Olympic Blvd., Los Angeles, California 90015 . . . or Call (213) 387-2173.
